

NANOCLEAN

PROTECTIVE GLASS COATING

Regency

A JELD-WEN Company

LOW
MAINTENANCE

NANOCLEAN PROTECTIVE COATING

Bring your bathroom to life with a bright and sparkling low maintenance showerscreen

Using the latest in Nanotechnology, Regency's Nanoclean bonds with your glass, forming an invisible protective barrier. Dirt and grime build up is not only minimised, but easily cleaned without the need for hard scrubbing or harsh chemicals, significantly reducing your cleaning time.

- Highly durable
- Chemical resistant
- Bonds permanently
- Maintains clear, bright, sparkling glass

UNTREATED GLASS

TREATED GLASS

**REVOLUTIONARY
PROTECTION**

**EASY
CLEANING**

**Spend less time cleaning,
and more time enjoying
your home**

Nanoclean repels both oil and water based substances, so it not only remains cleaner for longer, but any dirt or grime that does appear on the surface is easily wiped clean using a damp microfibre cloth. What does this all mean for you? Up to 90% less cleaning time.

- Repels both oil and water based substances
- No hard scrubbing
- Up to 90% less cleaning time

**BUILT
TO LAST**

THE ULTIMATE PROTECTION

A short term investment that offers long term rewards

Regency's Nanoclean reduces the build up of naturally occurring elements, such as lime deposits, that cause corrosion and decay that can lead to long term damage. As well as reducing your cleaning time, Nanoclean offers genuine protection for your glass.

- Protects against staining
- Reduces build up of soap scum, hard water and lime scaling
- 10-year warranty

A NATURAL
SOLUTION

ENVIRONMENTALLY **FRIENDLY**

Elevate the appeal of your home on the inside, and look after the outside world

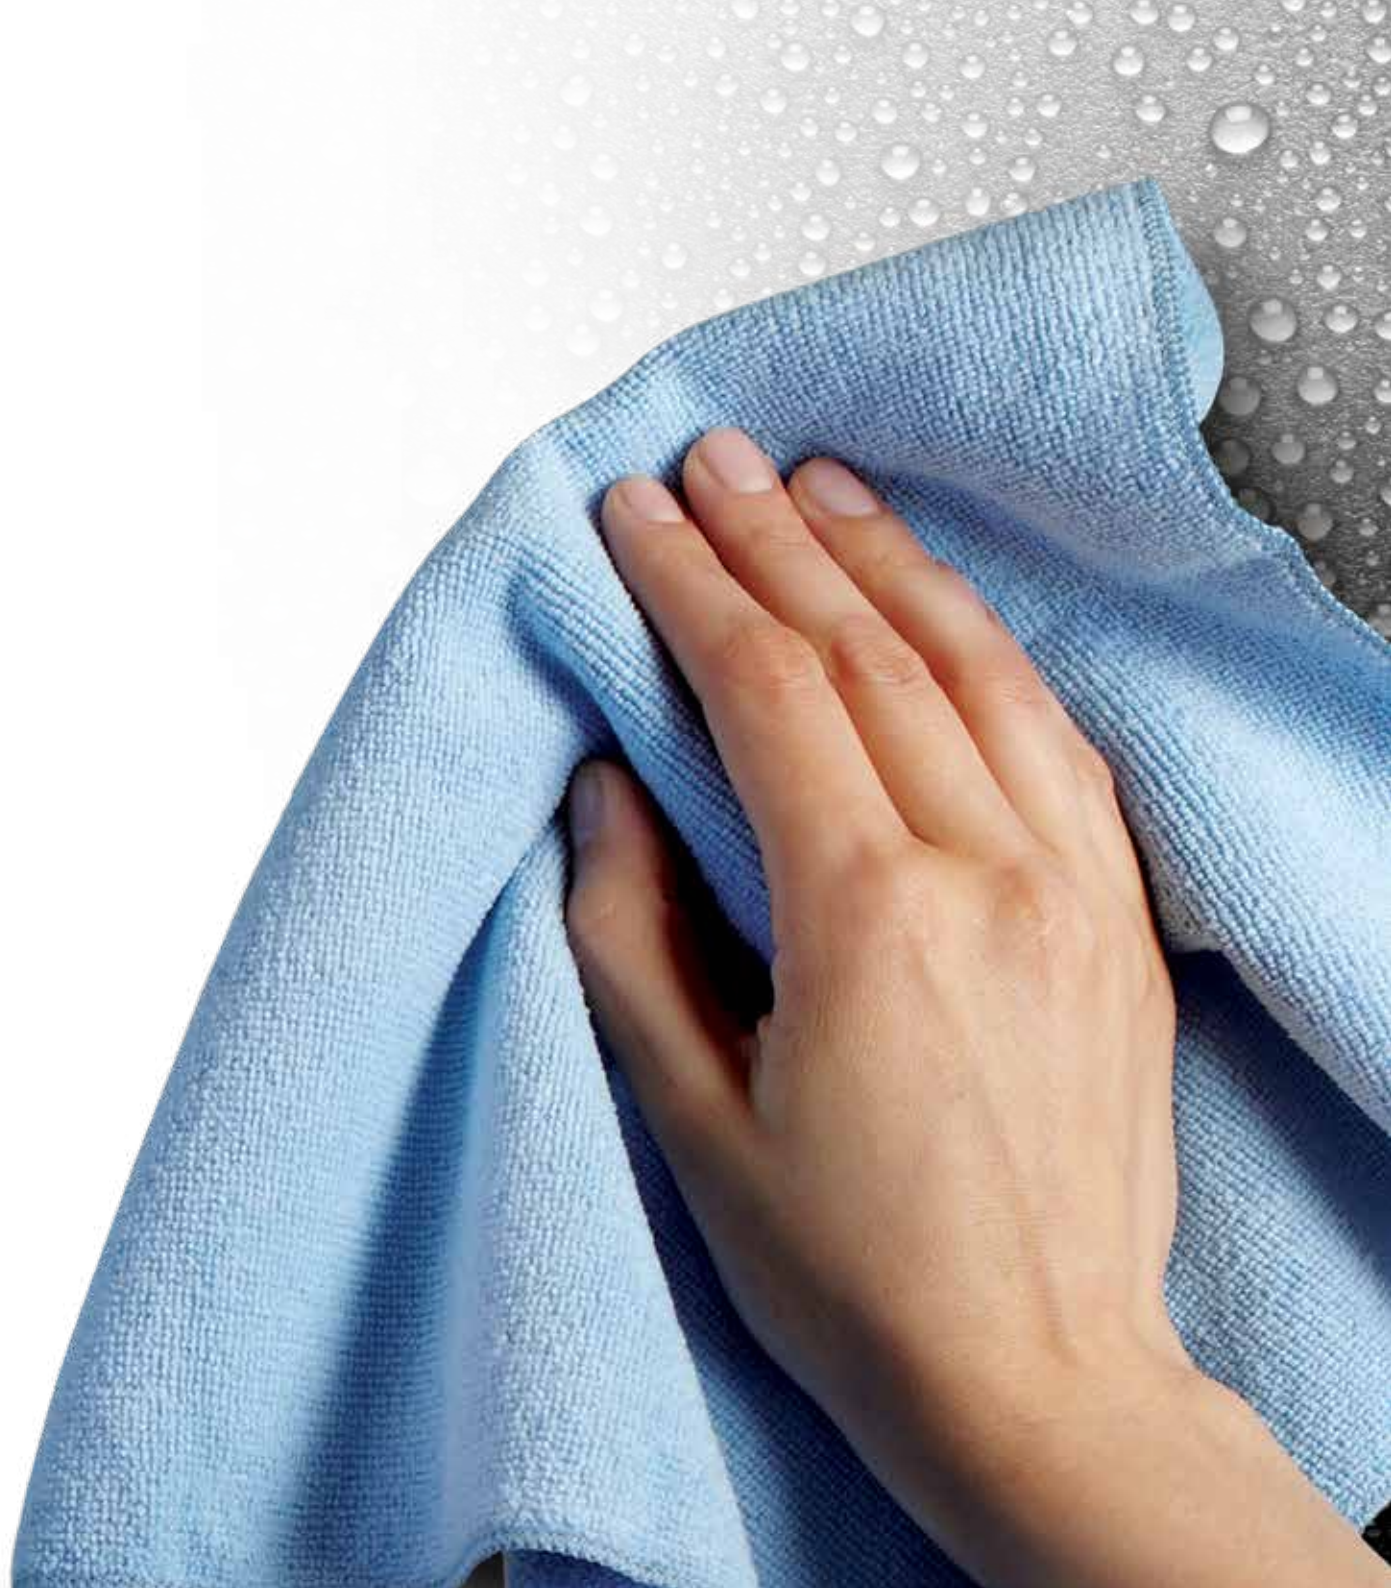

For most of us, when we think of cleaning we think of harsh chemicals and abrasive materials. Regency's continuous pursuit of cutting edge innovation doesn't stop at visual appeal, it also extends to environmentally sound and sustainable practices. If you wouldn't use it on your skin, then you don't need to use it on Nanoclean. Simply wipe down with a damp microfibre cloth.

- Reduces the need for harsh chemicals
- Simple to clean with a microfibre cloth
- The need for glass replacement is reduced

CARE AND MAINTENANCE

To maximise the benefit and durability of Nanoclean, we recommend the following cleaning routine:

- A quick clean once a week, or as required, with a damp good quality microfibre cloth will remove soap scum and grime from the glass. You may also use a mild detergent such as dishwashing liquid at a 0.5% solution (5g to a litre of fresh water is recommended).
- The use of a high quality professional grade squeegee (such as Ettore or Pulex) may be used to dry the glass. Do not use a squeegee on dry glass as this may damage the coating over time.
- Do not to use any rough, gritty, highly acidic, alkaline or abrasive cleaners such as Comet (powder), Ajax, bleach or cerium oxide as they may damage the protective coating. As well as being unnecessary, **using them will void your warranty.**
- For areas with hard water, high silica levels or bore water, more regular cleaning with a vinegar solution (1 part vinegar / 5 parts water solution) and a damp microfibre cloth may be required.
- After cleaning, a thorough rinse should follow immediately.
- These cleaning instructions need to be followed, or your warranty will be void.

NANOCLEAN WARRANTY

For your peace of mind, Nanoclean protective glass coating is covered by a 10 year warranty.

- Your Nanoclean coating is factory applied to your showerscreen so you can be confident that you receive a quality and consistent product.
- Nanoclean will resist water and oil based stains for a 10-year period.
- Glass needs to be maintained as per the care and maintenance instructions. Failure to do so will void your warranty.
- We will reserve the right to inspect the glass in order to determine that the product has been maintained in a manner consistent with the directions and care instructions.
- For full terms and conditions and to download a copy of the warranty visit regencyscreens.com.au or ask your Regency sales consultant.
