GALLERIA WARDROBES

Regency's Galleria Series is all about customisation and personalisation. More than just a wardrobe, the Galleria is a functional space individually tailored to meet your lifestyle needs via intuitive design and savvy accessories.

Within the Galleria Series, there are three unique collections from which to build your ideal wardrobe.

You can build your Galleria exclusively using pieces from one collection, or mix and match the colours, handles, accessories and drawers from all three. The choice is yours.

- The three collections have something for everyone
- Mix and match between the Galleria series to truly personalise your wardrobe*

- We understand that sometimes budgets are tight, so why not build on a base Essential robe with Tailored and Couture options to create a more high end feel?
- Our sales consultants will help you create the perfect wardrobe

*Please note that some accessories and drawers are only available in certain sizes therefore are not able to be moved between the different Galleria wardrobes.

YOUR VISION BROUGHT TO LIFE

GALLERIA DESIGN CONSULTATION

With a Galleria wardrobe, you get to play designer. We build robes with your style, needs and personality in mind. Which is why we offer a free design consultation at your home, or in our showroom, at a time that suits you.

STEP ONE

Arrange a time to meet with a Regency consultant at your home, or your local showroom, for a design consultation. Our consultant will ensure your style requirements and functionality needs are more than met, and can even discuss today's current design trends and forecasts.

STEP TWO

This part's the fun part, our consultant will discuss colours and finishes, handle selection, drawers and accessories before taking you through some initial design concepts.

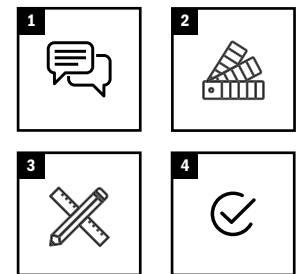

We work closely with architects, builders and designers to create custom solutions for their clients. The Galleria Series is designed to be incredibly flexible, with a range of options and sizing specs to suit an architect or designer's brief. Our experienced installation team can work directly with your builder to ensure a seamless build.

STEP THREE

Based on your discussion, our design consultant will present a final design concept and a preliminary quote. From here, we will continue to finesse the design and confirm a delivery schedule that meets your requirements.

STEP FOUR

Finally, our Regency installation team will manage the project to completion. From onsite inspections to final installation, we'll ensure every detail is installed to specification.
